

The Brixton Blood Donor Centre

The NHS Brixton Blood Donor Centre takes up a prominent position within the local community.

Sickle cell disease is the fastest growing genetic condition in Britain; it's hoped that the opening of the Brixton Blood Donor Clinic will encourage everyone but especially, members of the Black community, to donate.

The centre is open every day and is located at 444 Brixton Road, SW9 8BH.

Please scan the QR code shown for more details on the Brixton Blood Donor Centre including opening hours and on how to book an appointment.
